SUMMARY

I am a developer passionate about technology, dedicated to creating innovative and functional solutions in all aspects of fullstack development. With a solid background in Systems Analysis and Development and Computer Science, I have a wide range of skills ranging from constructing dynamic and intuitive interfaces to designing robust and scalable backends. Throughout my career, I have gained experience in developing modern web applications using technologies such as JavaScript, React, and Node.js. My user-centric approach, which emphasizes user experience, efficiency, and performance, results in exceptional user experiences. My professional journey includes active participation in projects which enhanced my skills and expertise. I actively immerse myself in agile methodologies such as Scrum and contribute to the complete development cycle of software. I have practical experience working with databases, both relational and NoSQL, and implemented innovative solutions focused on process optimization and task automation. I have also worked remotely to develop and deploy web solutions using SSR-oriented frameworks such as Gatsby and Next.js. My work in various teams involved effective collaboration with several pages and APIs, demonstrating my proficiency in creating engaging and visual experiences. I am seeking challenging opportunities in fullstack development where I can continue to improve my skills and contribute to innovative projects. I am motivated by the constant pursuit of technical excellence and committed to offering solutions that exceed expectations.

EXPERIENCE

Data Monitoring Analyst

Global Hits

June 2024 - Present, Asa Norte, Brasília - DF

- Maintaining data quality, monitoring reporting systems, providing continuous feedback and support for ongoing changes.
- Communicating data quality improvements with teams and clients, participating in planning and review sessions for data cleanups and analyses.
- Experienced in maintaining end-user training modules, supporting monthly training sessions on advanced SQL and the system Data Model, and monitoring upstream applications for table changes to ensure data integrity.
- Analyzed and visualized large datasets using Python and SQL, increasing data accuracy by 25% and providing actionable insights for strategic decision-making.
- Developed and implemented a real-time data monitoring system, improving data accuracy by 25% and reducing analysis time by 30%.

Technology Analyst II - Full Stack Developer

Algar Telecom

June 2022 - April 2023, Uberlândia, Minas Gerais - MG (Remote)

- Frontend Development Specialist specializing in Gatsby and React, with extensive experience in agile methodologies.

- Currently engaged in the redesign of multiple pages on the Algar Telecom website, focusing on enhancing user experience and optimizing performance during both remote collaboration and project sprints.
- Involved in stakeholder meetings, design iterations, user testing, and product improvement plans to ensure final projects met client requirements and exceeded expectations.
- Developed and deployed multiple full-stack web applications using technologies including JavaScript, React, Node.js, and Amazon Web Services, increasing system efficiency by 25%.
- Engineered a robust e-commerce platform achieving a 25% increase in user engagement and a 15% boost in conversion rates within the first quarter.

Information Security Analyst

BRB Banco de Brasília (Sede)

March 2022 - July 2022, Asa Norte, Brasília - DF

- Development of international solutions for replacing software written in outdated languages with the refactored use of modern languages, NodeMailer, React, Chakrual and internal authentication with LDAP.
- Development of internal systems for automation and analog processes with dashboards and anomaly detection.

Javascript Backend Developer

Cartório Colorado

October 2021 - March 2022, Sobradinho, Brasília - DF

- Work in the development of notary's office applications using StackRocket, NodeJS, model-based tests with Jest, state machines with XState, JavaScript + GitHub, microservices with Docker + Kubernetes and GKE.
- Use of the Google Cloud as infrastructure and work on backend application development with NodeJS.
- Perform model-based tests with Jest, state machines with XState, DevOps with Kubernetes and CI/CD with GitHub Actions.
- Developed and deployed scalable RESTful APIs using Node.js, Express, and MongoDB resulting in a 30% improvement in data retrieval speeds and supporting over 50,000 active users monthly.

Infrastructure Technician

EBSERH

November 2020 - October 2021, Asa Sul, Brasília - DF

- Worked in the IT governance area, participating in large projects of inventory mapping, infrastructure analytics dashboards, infrastructure support, and customer service, making use of analysis systems, developing environment.
- Work on VMware, BV visual design for dashboards applied to IT with training for internal and carry out monitoring with Zabbix.
- MiMind mental maps for organization and visual designing.

Jr Quality Analyst (QA)

Stefanini IT Solutions

July 2019 - November 2020, Asa Sul, Brasília - DF

- Worked in the Quality and Assurance area focusing on routine monitoring in the Service Desk environment.
- Conducting monitoring, feedback, calibrations, TQC's (Total Quality Control) working in the area of policy development and asset management, call management, compliance and monitoring the continuous improvement of contracts in which I worked.

IT Technical Support

UnB - Universidade de Brasília

August 2018 - July 2019, Ceilândia, Brasília - DF

- Expertise in technical support, user support, computer network configuration, hardware maintenance, computer lab maintenance, cabling structure maintenance, Cloud Computing and other IT services in general.

Purchasing Apprentice

Hospital Santa Marta

December 2016 - August 2018, Taguatinga Sul, Brasília - DF

- Worked in the purchasing and quality sector, performing the work of raising product inventory reports and purchase orders, investigating the history of mandatory quality constraints of supplier companies.
- Assisted with the planning of input demand, organizing documents, feedbacks to suppliers and control action plans for atypical features
- found in purchased services or products.

EDUCATION

Analysis and Systems Development

Centro Universitário IESB • Brasília, DF • 2020-2022

Computer Science

Universidade de Brasília - UnB • Brasília, DF • 2017 (Pendant)

CERTIFICATIONS

Bootcamp Carrefour Data Engineer

Digital Innovation One Inc. • Aug 2021 - No expiration

Bootcamp Cognizant Cloud Data Engineer

Digital Innovation One Inc. • Aug 2021 - No expiration

IBM Data Science

Coursera - IBM • Dec 2020 - No expiration

Technical Support Foundations

Google Inc. • Dec 2020 - No expiration

Python for Data Science

LinkedIn • Nov 2020 - No expiration

DevOps Foundations

Estabilis Academy • Nov 2020 - No expiration

Big Data & DevOps Essentials

4Linux • Nov 2020 - No expiration

Remote Work and Virtual Collaboration

CertiProf • Dec 2020 - Dec 2022

KanBan Foundation - KIKF

CertiProf • Nov 2020 - Nov 2022

Cyber Security Foundation - CSFPC

CertiProf • Nov 2020 - Nov 2022

Scrum Foundation Certificate - SFPC

CertiProf • Sept 2020 - Sept 2022

SKILLS

Programming Languages: Python, JavaScript, TypeScript;

Frontend: HTML5, CSS3, ReactJS, Figma, Tailwind CSS, NextJS;

Backend: NodeJS, Express, Adonis, NestJS;

Databases: PostgreSQL, Google Firebase, MongoDB, MySQL, PrismaORM;

Other Skills: Data Science, Data Engineering, CI/CD, Agile methodologies, Observation Tools, Cloud, DevOps.
